CAREER GOAL

"To aggressively invest in my self-growth and become a great asset to any organization."

WORK EXPERIENCE

Fall 2017 — **CodeChat**

Worked with a 9-man team to design and build a chatting application that could run and compile code immediately via web. I was the assistant programmer for the JavaScript modules. I created designs for the specification, worked on the application's back-end socket.io connections, and also helped build the Node while putting in pieces in the database. Our whole system utilizes websockets between the webapp, the chat server, and the compiling server, making it as network performant as possible.

June 2018 Preset — **Feniex Industries – Software Development Intern**

Worked with the engineering department. Using React Native, I repaired an abandoned application used on both the iOS and Android phone, then updated it to have the correct products and features for company and customer use. This app allows the users to interact with the lights that the Feniex Distributes. Working in React Native while using Redux to handle the states, I was able to absorb different techniques.

I also joined the marketing department where I assisted the web team in developing a brand new platform for their website called Build-A-Bar. This web application was built using Angular for the front-end and Druple for the back-end. This project also uses javascript, and HTML with sass and css. Each bar's information is stored using an object. Once an object is created it gets pushed in an array. When the bar is complete, the array is sorted using bubble sort and is sent to the manufacturing department. Build-A-Bar is unique because no other Emergency Lighting company provides customization like this.

EDUCATION

2015 - 2018 **Sam Houston State University, Huntsville**
Computer Science Major
Information Systems Concentration
Kinesiology Minor

TECHNICAL PROFICIENCIES

Languages	Frameworks	Tools	Databases
Python	Node.js	GIT	SQLITE
Java	Socket.io	NPM	
C++	Android		
JavaScript	Drupal		
Angular	ReactNative/Redux		

SKILLS & EXPERTISE

- Time Management
- Organization
- Assertive
- Leadership
- Communication
- Multitasking
