CAREER GOAL

"To aggressively invest in my self-growth and become a great asset to any organization."

WORK EXPERIENCE

January 2019 - November 2019

Feniex Industries – Software Engineer
Using Electron and React to build a custom software inside Feniex's new innovative controller. The software interprets JSON packets received from the OBD2 and the relay, which controls global states based on the users programmable input and implements functionality depending on the user.

September 2018 - January 2019

Feniex Industries – Software Developer
Assisted the web team in re-skinning their current website and also developed a unique platform called Build-A-Bar. This web application was built using HTML/CSS for the front-end and JavaScript/Angular for the back-end.

May 2018 - September 2018

Feniex Industries – Software Developer Intern
Using React Native, I repaired an abandoned application used on both the iOS and Android phone, then updated it to have the correct products and features for company and customer use.

July 2013 - May 2018

Dual Sport Athlete – Sam Houston State University
Collegiate athlete, balancing 25 hour training weeks, a minimum of 15 hour class hours per semester, at home projects and a social life. Placing second in the Southland conference tournament in Volleyball, I was also a three time Southland conference medal winner in the heptathlon running Track.

EDUCATION

2013 - 2018 — **Sam Houston State University, Huntsville**
Computer Science Major
Information Systems Concentration
Kinesiology Minor
